Sharing VJ-3 & VJ-4 Borescopes With Future Aviation Maintenance Technicians

This month ViewTech was invited to meet and demonstrate the VJ-3 and VJ-4 video borescopes with aspiring Aviation Maintenance Technicians at the Career Tech Aviation Maintenance program, not far from our headquarters in Traverse City, Michigan.

Throughout the day, more than 40 students were able to grow their knowledge of aviation maintenance, repair, and inspection to use while using ViewTech's video borescopes.

With many industries experiencing a shortage of skilled workers, the 21 different technical educational programs offered by Career Tech are putting students on the fast track to success.

Ending the year at NAAA Ag Aviation Expo

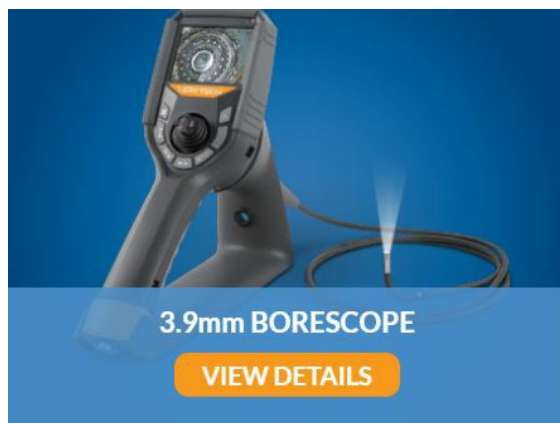

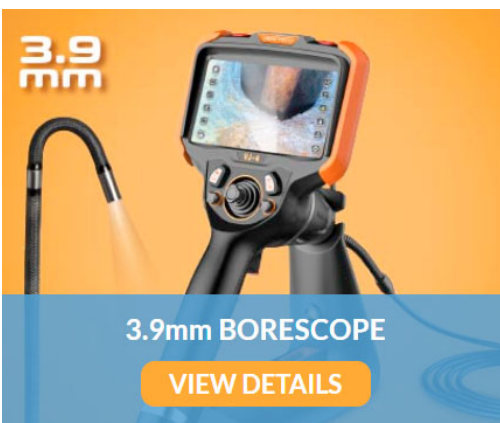

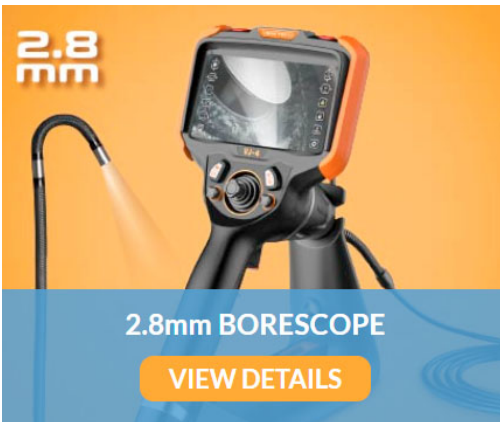

Since 2014, ViewTech Borescopes has exhibited at the NAAA Ag Aviation Expo. This annual agricultural aviation event brings together operators, pilots, suppliers, and industry allies.

For the 2023 Ag Aviation Expo, Zack made his way to Palm Springs, California and met with attending aerial applicators at ViewTech

Borescope booth. Before the Ag Aviation Expo ended, Morris Ag-Air upgraded their toolbox to include the VJ-4 3.9mm x 1.5 meter video borescope.

[Researchers Find Way To Weld Metal Foam Without Melting Its Bubbles](#)

Researchers at North Carolina State University have now identified a welding technique that can be used to join composite metal foam (CMF) components together without impairing the properties that make CMF desirable. CMFs hold promise for a wide array of applications because the pockets of air they contain make them light, strong and effective at insulating against high temperatures.

[Louisiana Approves First Offshore Wind Farms With Vestas And Mitsubishi](#)

Louisiana's Department of Natural Resources approved the state's first offshore wind operating agreements during its December board meeting opening up the potential for wind farms to be developed in the state's waters. The two projects, which involved subsidiaries of Mitsubishi and Vestas, come as the federal lease auctions for the

Gulf of Mexico have also begun but so far drew limited interest.
