

BORESCOPE NEWS

COMING INTO VIEW: TC COMPANY IS TOP SELLER OF VIDEO BORESCOPES IN NORTH AMERICA

For a company specializing in looking in difficult places, ViewTech Borescopes is incredibly inconspicuous. The brick building on Barlow Street sits behind a brick wall bearing the name of the company.

A newly constructed apartment complex sits just north and to the east. Most of the public parking lot traffic comes when people miss the turn for the Michigan Secretary of State office a short distance to the south.

An articulating camera snakes down, back up and out the elongated 'V' in the first letter of the company. It's the only hint that inside is top seller of video borescopes in North America.

But for those who need visually inspect small spaces, the importance of ViewTech Borescopes and its Traverse City office are clear. Because no matter how hard the office may be to locate, those in aviation maintenance and turbine engine inspection know one of the company slogans often shines an LED light on an important issue: "You can't fix what you can't see."
