VJ-4 Video Borescope on the Road with TCGM

ViewTech's newest video borescope has hit the road with [Tower Climbing Grease Monkeys \(TCGM\)](#) during their Brothers Keepers Tour.

Starting in Louisiana and ending in Canada, TCGM will be visiting more than [60 wind farms](#) and connecting with those who work in the field.

From sharing knowledge and experience to discussing best practices and equipment, TCGM has connected wind turbine technicians across the world.

Explore how a ViewTech video borescope can assist the [wind energy industry](#) with maintenance and inspections.

INDUSTRY NEWS

[Spirit AeroSystems to Develop Composite Airframe Manufacturing Concept Under NASA Project](#)

Spirit AeroSystems has booked a contract to develop a concept for making airframe structures for a project that supports NASA's Sustainable Flight National Partnership with the aviation sector. NASA awarded the grant under the Hi-Rate Composite Aircraft Manufacturing project involving 14 organizations that will conduct initial development efforts, Spirit said Tuesday.

[3D-printed Ceramics May Increase Gas Turbine Fuel Efficiency, Researchers Report](#)

Airplane engines can reach temperatures of more than 3,000 degrees Fahrenheit. The hotter they get, the more fuel efficient they become, but that efficiency is limited by how hot the metallic components inside the turbine can get without deforming.
