Borescope Inspections with a Centering Device

ViewTech Borescopes 6.0-millimeter mechanical articulating video borescope is commonly used in applications where orbital welds, piping or tubing is needing to be inspected. Many technicians find it helpful to [utilize a centering device](#) during these inspections.

A centering device is designed to allow the insertion tube, camera, and lights of the borescope to be lifted within the inspection area, providing a better perspective to look down and forward within the inspection area. This video will show you how to properly install a ViewTech video borescope center device and demonstrate how it can assist with your borescope inspection, maintenance, or quality assurance procedures.
